

SMARTzero Customer Testimonials

“ **SMARTzero** has rescued our business a few times over the past few months, once when staff went home and left a freezer door open which, prior to **SMARTzero**, would have resulted in a substantial loss of stock and revenue: it literally paid for itself that night.

We chose **SMARTzero** here at the Loughborough Schools Foundation as we could see how easy it is to install: non-invasive with no drilling through equipment to connect the sensors to the receiver. It is connected to our Wi-Fi and gives me real-time, live temperature readings across campus to help with our **EHO** and **HACCP** reports. The sales and after-sales support have been exemplary and any suggestions we have made, to make our lives easier, have been listened to and acted on. ”

SMARTzero is low-cost, reliable, and self-installable, requiring no technical knowledge or specialist electrical installation. Within 30 minutes, businesses can have real time data available to them on any device that has internet access.
